

Facilitating Clinical Research

- Catering to the leaders in
the pharmaceutical and
biotechnology industry
- meeting their expectations
and surpassing it
 - through our professional
commitment to achieving
quality within agreed
timelines

Offering the most stringent quality services in:

- Clinical Research: BA/BE studies in healthy volunteers (including post-menopausal women), clinical trial management, clinical data management, bioanalytical and statistical services - Operating from its world-class facility built to international standards: self-contained 80-bed clinical facility and state-of-the-ART instrumentation in bio-analytical laboratory.
- Diagnostic laboratory services: clinical biochemistry and serology (NABL accredited), haematology, endocrinology, enzyme assays.
- Non-clinical animal toxicology: CPCSEA registered facility offering - acute, sub-acute, chronic, reproductive, mutagenicity and carcinogenicity studies.

Bringing the expertise of experienced scientists and investigators knowledgeable in world-wide regulatory requirements.

Assuring the highest quality standards, put to the test, inspected and approved by the US-FDA.
